

KRISHNA GUPTA

B.Tech in Artificial Intelligence & Data Science

Phone: +91-8955915536 | Email: 16krishnagupta06@gmail.com | LinkedIn: linkedin.com/in/krishna-gupta333 | GitHub: github.com/KrishnaGupta-coder | Location: Jaipur, Rajasthan

CAREER OBJECTIVE

Passionate B.Tech student specializing in Artificial Intelligence and Data Science. Possesses strong competencies in machine learning, computer vision, deep learning models, and full-stack software development. Dedicated to building responsive human-computer interfaces, real-time automation pipelines, and robust systems to solve real-world problems.

EDUCATION

Arya College of Engineering & IT <i>B.Tech in Artificial Intelligence and Data Science CGPA: Pursuing</i>	Jaipur, Rajasthan 2024 - 2028
Shanti Asiatic School <i>Senior Secondary (Class XII) Board: CBSE Score: 82.00%</i> <i>Secondary (Class X) Board: CBSE Score: 79.00%</i>	Jaipur, Rajasthan 2023 - 2024 2021 - 2022

TECHNICAL SKILLS

Languages: Python, C++, C, HTML5, CSS3, JavaScript	
Libraries & Frameworks: PyTorch, TensorFlow, OpenCV, NumPy, React.js, Three.js, Framer Motion	
Specializations: Machine Learning, Computer Vision, Web Development, AI Tools, Qdrant Vector DB	
Developer Tools: Git, GitHub, VS Code, Vercel, Supabase, Firebase	

EXPERIENCE

Hacker's Unity Community – Core Team Organizer <i>Event Management & Community Logistics</i> - Coordinated logistics milestones, registration databases, and on-ground track routing for premium technical summits, including the World Computer Hacker League (WCHL) and HackStorm. - Managed event operations and technical tracking check-points for over 100+ active coders and participants.	Jaipur, Rajasthan 2025 - Present
Team Synapse – Team Lead & SIH 2025 Solver <i>AI & Systems Pipeline Engineering</i> - Designed, engineered, and optimized computer vision and machine learning frameworks for real-world automated classification. - Deployed smart warning networks connecting remote citizens with satellite radar sensors for early disaster detection.	Jaipur, Rajasthan 2025 - Present

PROJECTS

ZeroTouchSec – Gesture-Driven AI Automation <i>Python, PyTorch, OpenCV</i> Developed a touchless computer vision interface system translating real-time gesture feeds to system controls at a smooth 30 FPS.	
AI Campus Attendance – Face Recognition System <i>Python, Qdrant Vector DB, React</i> Engineered an automated recognition system matching 40+ faces in under 0.9ms with 99.4% precision using L2-normalized vector search.	

CERTIFICATIONS

- Machine Learning & Deep Learning:** Certified in neural architecture designs, model evaluation, and regression optimization.
- UI/UX Design Essentials:** Certified in prototyping, wireframing, layout hierarchy, and user-centered interaction principles.
- Programming Languages Foundations:** Verified competencies in high-performance OOP designs using **C, C++, and Python**.
- Git & GitHub Version Control:** Certified in source tree branches, conflict resolution, and enterprise repository collaboration.
